DETAILED ACTION

Claims 1-5, 7-13, 15, 17-22 and 25-27 are pending in this application. Claims 1, 8, 17 and 25-27 are independent claims.

The present title of the invention is "End point value correction when traversing an edge using a quantized slope value".

Allowable Subject Matter

1. Claims 1-5, 7-13, 15, 17-22 and 25-27 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Prior art references do not anticipate or suggest the limitation "computing initial vertex x,y values at end points proximate to each of the vertices of the polygon, wherein the end points define the outer edges of the first and last span that traverse the polygon; storing final x,y values for respective edge of the polygon, wherein, for respective edge, said final x,y values comprises the interpolated x,y values for non-end points of the respective edge, and said storing final x,y values comprises the computed initial vertex x,y values for at least one of the end points of the respective edge, instead of the corresponding last interpolated x,y values" in combination with the other claim limitations in claims 1, 8, 17 and 25-27.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
